- Rationalised tool selection
- Integration of tool order and ACB-order on one catalogue
- Errors are avoided
- Easy to use

Electronic TRUMPF press brake tool catalogue on CD-ROM

Available from 2001 - The year YOU make contact

The new TRUMPF press brake tool catalogue on CD-ROM:

Child's play to use thus saves time and is user friendly!

Fig. Screenshots from the datasheets

As from 2001 you have the possibility to order LASERdur®-hardened quality tools and ACB®-angle measuring sensors from TRUMPF with the newly developed electronic catalogue. The particularly high user friendliness results from the use of browser technology as the basis for "look and feel" from the new catalogue software. This guarantees that whoever can surf the "net" will have no difficulties whatsoever in operating the electronic catalogue for TRUMPF press brake tools.

An easy-to-follow set-up programme guides you through the installation: You can choose from 5 languages: German, English, French, Spanish and Italian and the catalogue prices are provided in your own currency.

Profit from the clearly structured user guidance and select the way you want to send your order from the electronic shopping basket to TRUMPF: By e-mail, by fax interface or you use the data in your own order form - it is all possible!

The bending lexicon integrated in the catalogue serves as a reference for TRUMPF press brake technologies and provides you with vast information on bending technology, the care of the tools and possible accessories.

The catalogue will be available for the following system platforms:

- Windows 95
- Windows 98
- Windows NT 4.0
- Windows ME
- Windows 2000

For further information please contact your TRUMPF distributor!

Look forward to an even more efficient and easy ordering of TRUMPF press brake tools and ACB-angle measuring systems!
