

Bending Tool Report

No. 2, May 2001

In the TRUMPF Bending Tool Report we keep you up to date with trends and news relating to the original TRUMPF bending tools. You can choose to read the Bending Tool Report on paper or, if you prefer, download it from the TRUMPF website (www.at.trumpf.com).

In this edition we introduce you to Version 1.0 of the bending tool catalog on CD-Rom.

Don't miss out on the advantages of this new way of ordering!

**Now available:
TRUMPF bending tool catalog on
CD-ROM, Version 1.0**

Your advantages:

- Paperless, fast ordering
- Clear navigation and consequently
- Rationalised tool selection
- Integrated tool ordering and ACB[®] ordering in just one catalog
- Error avoidance
- Ease of operation

Electronic TRUMPF bending tool catalog on CD-ROM

The new TRUMPF bending tool catalog on CD-ROM: so simple a child could use it and time saving and user friendly too!

With the new TRUMPF bending tool catalogue you can order LASERdur® -hardened quality tools and ACB® angular-positionmeasuring sensors paper-free.

The use of browser technology as the basis for the look and feel of the new catalog software makes the catalog particularly user-friendly. So we guarantee: if you can surf the Internet, you will find using the electronic catalogue for TRUMPF bending tools no problem at all.

A simple set-up program leads you through the installation:

You choose from five available languages: German, English, French, Spanish, and Italian and view catalog prices in your own currency.

Our software also gives you the opportunity to calculate the required press tonnage, bending length, the inner radius or the possible nesting height. After putting the tools you want in your "shopping basket", you conclude the order. The order is of course adressed to your usual TRUMPF sales partner.

A bending technology lexicon integrated into the catalog serves as a reference work for TRUMPF press brake bending technology and offers extensive information about bending technology, tool maintenance and available fittings. You'll also find here a detailed user-guide to the catalogue software.

The catalogue is supported by the following system platforms:

- Windows 95
- Windows 98
- Windows NT 4.0
- Windows ME
- Windows 2000

You can order the electronic bending tool catalog through your TRUMPF sales partner!
